Economics

- **Total revenues growth** (+45.7%) driven by:
 - The ability to be awarded projects with higher size;
 - Increased number of projects;
 - **Favorable market trends** (both for Interconnector and OWF markets) driven by the focus on the energy transition.
- **Impressive marginality** (EBITDA margin at 27.3% and EBIT margin at 24.5%) thanks to:
 - **Economies of scale** from larger project size;
 - **Optimization** of **personnel** costs, also through internalization of specific competencies;
 - Efficient management of vessels reducing mobilization or other inactivity costs;
 - Strong investments (around 15.7% of total revenues) allowing cost savings and new technologies enable the Group to operate effectively and efficiently.
- **ROI** is equal to 32.7%.
 - **Net income** (after 0.7 millions of net financial expenses and 3.7 millions of taxes) amounts to 21.1 millions (20.2%).
 - **ROE** is equal to 17.5%.

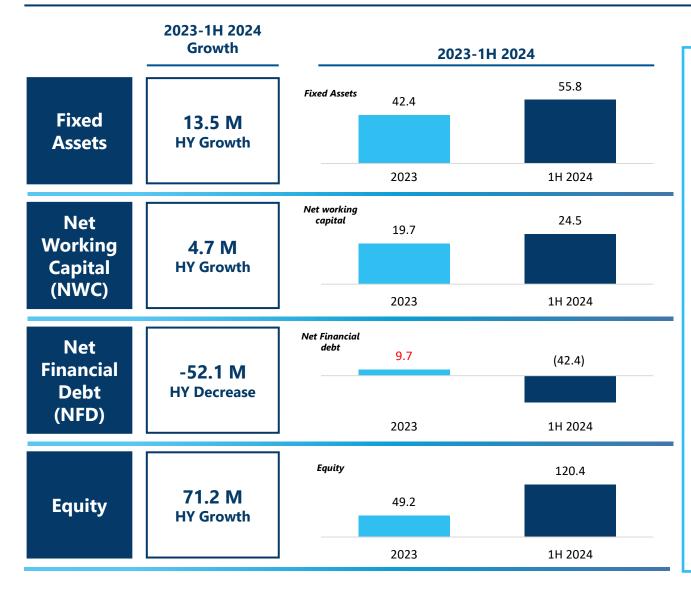

Costs details

- **Pay-per-use** strategy guaranteeing **high-cost flexibility** and keeping the **D&A costs** relatively low.
- Cost structure shows substantial stability in the two compared half year periods. Around half of operating costs are related to services. In particular, they mainly refer to costs of services carried out by subcontractors and external specialized personnel costs.
- Leases and rental costs mainly refers to vessels from third parties and equipment. Investment strategies contributed to the slight reduction of their weight on total revenues compared to first half 2023.
- Personnel costs are increasing due to business growth and the internalization of specialized staff.

14

Financials

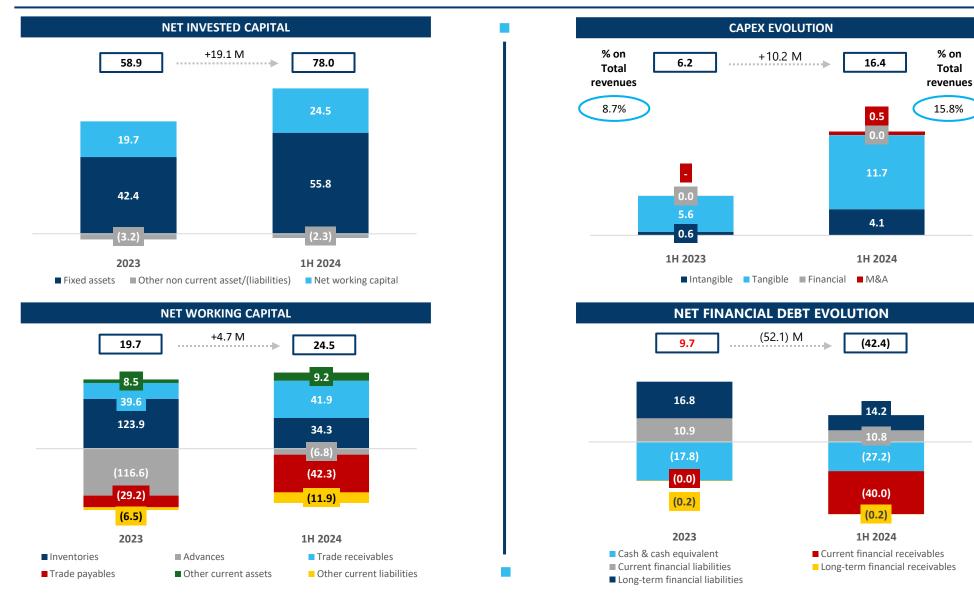

- **Fixed assets** increases of 13.5 millions due to the **significant capex** (16.4 millions, 15.8% of Total revenues), mainly in vessels and equipment made in the first half of 2024.
- Net Working Capital growth (+4.7 millions) due to the increase in business volume, primarily driven by the dynamics related to project progress:
 - DSO reduced from 96 days in 2023 to 72 days in 1H 2024;
 - **DPO** are essentially in line with the comparative period.
- NFD decreases significantly, despite significant investments, due to strong profitability, careful management of working capital and the liquidity raised through the listing process.
- **Equity** has **more than doubled** thanks to the significant net income (20.2% of Total revenues) and the capital increase carried out through the IPO.
